KEY TAKEAWAY

A single bold statement that anchors the whole story.

THE PROBLEM

Critical data is trapped in
documents nobody has time
to read.

BY THE NUMBERS

12hrs → 12 min

The time it takes to turn a stack of raw documents into clean, structured records your team can use.

“

Kin gave our team back a full day every week — and the data flowing into our systems is finally something we trust.

Director of Operations

Operations team, mid-market company

From document to decision, in three steps.

1

Ingest

Drop in PDFs, emails, or scans. Kin reads every page the moment it lands.

2

Structure

Figures are extracted, validated, and mapped to your fields — with every source cited.

3

Sync

Clean records flow straight into your systems, ready for the team to act on.

WHERE WE'RE HEADED

The road ahead

Now

Document intelligence

Automated extraction and structured output, live for teams today.

Next

Trend signals

Surface risk and opportunity across all your data automatically.

Later

Predictive scoring

Likelihood-to-close estimates grounded in your own historical data.

Vision

The knowledge copilot

Ask any question about your data and get a sourced answer in seconds.

ONE SYSTEM, TWO SURFACES

Built for light and dark.

LIGHT

Clear insights, better stories.

The same components, the same tokens — the theme flips with one attribute.

REST API

Build your own

SECURITY & TRUST

Your data never leaves your control.

Encrypted end to end

Documents are encrypted in transit and at rest with industry-standard AES-256.

Full audit trail

Every extracted figure links back to its exact source page, citable on demand.

SOC 2 Type II

Independently audited controls across security, availability, and confidentiality.

You own your data

No training on your records, no third-party sharing — export everything any time.
